

Create your own cosy dog's den for fireworks

Cover the den with a blanket or duvet to muffle the sound and provide comfortable bedding

Allow your dog the freedom to access the den at all times

Plug in an Adaptil Diffuser or use an Adaptil Collar to provide further reassurance

Give your dog treats, toys and chews so it associates the den with good things

Locate the den in a room where your dog likes to hide and spend time. This should be away from windows and be prepared ideally in advance. However if your dog already has a bolthole, make it comfortable, accessible and safe.
